Notes: Health Care Expenditures measure spending for all privately and publicly funded personal health care services and products (hospital care, physician services, nursing home care, prescription drugs, etc.) by state of residence. Hospital spending is included and reflects the total net revenue (gross charges less contractual adjustments, bad debts, and charity care). Costs such as insurance program administration, research, and construction expenses are not included in this total. For more information on definitions, sources, and methods, please see <http://www.cms.gov/NationalHealthExpendData/downloads/dsm-09.pdf>.
